REPORT OF HEALTH OFFICER

I herewith submit my report as Health Officer for the year ending January 31st, 1935.

We have had the following contagious diseases reported: syphilis, one; typhoid fever, one; tuberculosis, three; mumps, two; whooping cough, four; scarlet fever, ten; measles, forty-five.

I sent up for analysis ten pint lots of milk taken from dealers, with the following report: seven satisfactory, one excessive colon organism, one deemed adulterated with dirt (sediment), one very bad, having not only an exceedingly high bacteria count, but also dirt (sediment). The dealer who had the very bad milk has gone out of business and the others

have been warned that they must sell pure, standard milk or suffer the consequences.

In regard to the town water, a committee was chosen to try and locate some better water. They attended to their duties, several locations were tried with little success. The town water was tested about once a month and was reported good, except excessive iron. I have had several complaints about toilets and sewerage, which have been investigated.

I would recommend that the town at the annual meeting appropriate enough money to lay and cover pipes to take care of sewerage from the residence of Mary Donovan to the town dump. If this is done it will eliminate a whole lot of complaints.

I wish at this time to thank all who have co-operated with me in the discharge of my duties as Health Officer. It is only by your assistance and co-operation that results can be obtained.

Respectfully submitted,

GEORGE A. GILMORE.
